

2021/04/01

2021年4月より共通機器・ものづくりセンターの運営体制が変わります

SIT 総合研究所
事務局 研究推進室

平素より共通機器・ものづくりセンター運営にご理解とご協力を賜り深く感謝いたします。4月よりセンター専任のSIT総研特任教員2名が着任し、運営体制が大きく変わります。

特任教員2名は、それぞれ豊洲および大宮校舎を主担当として、大宮先端研の技術職員1名と共にセンター運営に当たります。これまでと同様、装置担当教員および学生職員の皆様にご協力を頂き、教職学協働にて持続的な運営を行います。

●装置担当教員の皆様へ

ご担当いただいている装置について、その保守・運営、あるいは故障時の対応等、専門家としての先生方のご協力に深く感謝します。学生職員の現場での補助業務を得て、2名の教員と技術職員1名により運営に当たらせていただきます。

●利用者の皆様へ

最先端の研究機器が開かれた環境で廉価かつ安全に利用できるのが芝浦工大の共通機器・ものづくりセンターの特徴です。豊洲・大宮2キャンパス構内の複数各所に分散し、研究分野が広範囲にわたる機器の運営は、多くの装置担当教員と学生職員のご協力を得て運営可能です。今後も、利用者一人一人が共通機器を大切に利用し、その際には安全に十分に心掛けていただきますようお願い申し上げます。

●共通機器・ものづくりセンター事務局（2021年度4月1日以降）

- ・豊洲校舎 教室棟1F テクノプラザ内
- ・大宮校舎 先端工学研究機構102室

以上。

April 1, 2021

The management structure of the Center for Shared Equipment and Manufacturing will change in April 2021.

SIT Research Laboratories
Research Promotion Office, Secretariat

We would like to express our sincere appreciation for your understanding and cooperation in the operation of the Center for Shared Equipment and Manufacturing.

The two specially appointed faculty members will be in charge of the centers in Toyosu and Omiya campuses, respectively, and will work together with a technical staff member in Omiya Campus. As in the past, we will continue to operate the center with the cooperation of the faculty members in charge of the equipment and the student staff.

- To the faculty members in charge of the equipment:

We would like to express our sincere gratitude for the cooperation of the faculty members who are experts in the maintenance and operation of the equipment they are in charge of, as well as their response in case of malfunction. With the assistance of student staff, two faculty members and a technical staff member will be in charge of the operation.

- To all users:

One of the features of the SIT Shared Equipment and Manufacturing Center is that cutting-edge research equipment can be used safely and inexpensively in an open environment. The equipment, which is dispersed throughout the Toyosu and Omiya campuses and covers a wide range of research fields, can be operated only with the cooperation of many faculty members and student staff members in charge of the equipment. We hope that all the users will continue to take good care of the equipment and keep it safe when using it.

- Offices of Center for Shared Equipment and Manufacturing (after April 1, 2021)

Toyosu campus: Techno Plaza, 1F of the Classroom Building

Omiya campus: Room 102, Research Organization of Advanced Research and Engineering
